MARTINEZ, JAVIER

Inspection

Type: ROUTINE INSPECTION

Date: JUL-08-2003

PO BOX 638
INTERCESSION CITY, FL 33848

INVENTORY - 3 KANGAROOS

NO NON-COMPLIANT ITEMS NOTED DURING THIS INSPECTION.

NOTE: THIS FACILITY IS A TRAVELING EXHIBITOR, AND THIS INSPECTION WAS CONDUCTED AT TED RHODES PARK, UNIVERSOUL CIRCUS, NASHVILLE, TN. IT WAS ALSO IN RESPONSE TO A COMPLAINT, WHICH ALLEGED POOR VETERINARY CARE OF ONE OF THE ANIMALS. THE LARGEST ANIMAL, ROCKY, HAS A LARGE SWELLING ON THE RIGHT MANDIBULAR AREA. IT IS OBVIOUS THAT SURGERY HAS BEEN PERFORMED, AND A SURGICAL DRAIN IS PROTRUDING FROM THE LESION. AT LEAST TWO SURGICAL PROCEDURES HAVE BEEN PERFORMED ON THIS ANIMAL, THE FIRST 1.5 MONTHS AGO, DURING WHICH TIME A CULTURE WAS PERFORMED- KLEBSIELLA, PSEUDOMONAS, AND STREPTOCOCCI WERE CULTURED. THE LATEST SURGERY WAS PERFORMED ON 7/7/93 AT THE UNIVERSITY OF TN VET SCHOOL. THE ANIMAL IS CURRENTLY ON TWO ANTIBIOTICS. I EXAMINED THE ANIMAL AND IT WAS IN GOOD FLESH AND MOVED SATISFACTORILY. IT SEEMS TO BE PROGRESSING NICELY. NO EVIDENCE OF LUMPY JAW HAS BEEN SEEN BY THE VARIOUS VETERINARIANS WHO HAVE TREATED THIS ANIMAL.
